

TOUGHENED GLASS

*We make it easy for you to get the perfect
toughened glass for the job*

Toughened Glass

We process and toughen the widest variety of glass for many applications, including the PLANITHERM® range of low-E products for domestic sealed units. With decades of experience and a highly skilled processing team, we will cut glass to your exact requirements. We arriss the edges before tempering the glass to the best optical standards on one of our state of the art furnaces. The toughened glass is then filmed to protect it during transit and delivered to your door.

Images for illustration purposes only.

With toughened and heat-soaked glass available up to 2.7 x 4.1 sqm, we're geared up to go large and supply products for the current trend of glazed extensions incorporating large expanses of glass such as sliding, patio and bi-fold doors, roof lanterns and fully glazed walls and roofs.

Wide range of options:

- **Float**
- **Low iron**
- **Low-E**
- **Solar control**
- **Patterned**
- **Low maintenance**
- **And more...**

Toughened glass for IGUs is available next day.
